Plant America

MEMBER

American Association of Nurserymen
Southern Nurserymen's Association
N. C. Nurserymen's Association
American Camellia Society

Nursery Located on Highway 87
5 Miles South of
FAYETTEVILLE, N. C.

We wish to thank our many customers for their liberal patronage over the past years. We shall continue to solicit your orders in the future.

Terms and Conditions

It is our desire to furnish you with clean, well grown stock at all time. If we do a good job of digging and planting, we cannot hold ourselves responsible for plants that may die later in the season. However, if the plant material that we plant ourselves fails to start off to grow in the spring season, we will replace free of charge, provided there are no conditions beyond our control. This does not necessarily apply to plants sold at wholesale.

We are not equipped to do any packing and shipping, especially out of the state. Terms are cash on delivery at our nursery unless credit is properly established.

Prices in this catalog are reasonable, we think, and consistent with our good quality stock. However, we shall be glad to quote you prices on larger quantities, or any other conditions that will help us to reduce expenses on the order. Also, we have some plants and sizes not listed here and we solicit your inquiry.

Our plants are inspected and certified by the North Carolina Department of Agriculture.

Centipede Grass

We have been growing and planting this grass for many years here in this section of the state. We have also used it in the Piedmont section with good results. Will grow in poor soil under shade conditions better than any other grass that we have tried. Bushel of sprigs will cover approximately 800 sq. ft.

BUSHEL \$2.50 here at the nursery. Twenty-five bushels and up, \$2.00.

BROADLEAF EVERGREENS

ABELIA

18-24" -----	2.00	2-3' -----	2.50

4-5' -----	4.50	5-6' -----	5.50

Most of these are regular pink, with some light pink and we also have some white. We hope to have, in two or three years, a good stock of dark red ones from one of our own seedlings.

In addition to the above List of trees and other plants, we are in the process of growing a good many other fine native trees.

Azaleas in many other varieties in smaller quantities

We have many other varieties of plants in limited quantity and sizes as follows:

Eng. dwarf box.
Podocarpus
Loquat
Ilex opaca
Sand myrtle
Wax Myrtle
Jas. primulianum
Flowering almond
Snowball
Woodbine
Star jasmine
Clematis
Boston ivy
Vinca minor & major
Yellow jessamine
Jas. nudiflorum
Lig. quihoui
Magnolia
Pittosporum
Tea Plant
Vib. odorotissimum
Jun. sargentii
Jun. Hetzi, large
Jun. sylvestris
Retinosporo
Catalpa
Rhus cotinus
Rhus copalina
Rhus typhina
Norway maple
White birch
Chinese chestnut
Lombardy poplar
Aronia
Hibiscus
Hydrangia quercifolia
White quince
Red quince
Orange red quince

Pearl bush.
Philadelphus
Golden rain tree
Halesia
Paper Mulberry
Chestnut oak, large
American linden
Baccharis
Hydrangia otaksa
Lon. fragrantissima
Deutzia
Spirea VanHouttei
Spirea arguta
Harlandi box
Cot. Microphylla
Ilex latifolia
Eng. Laurel
Jas. floridum
Lon. Heckrottii
Trifoliate orange
Weigelia
Bignonia radicans
Bignonia capriolata
Vir. creeper
Eng. Ivy
Wistaria
Jas. humile
Leucothoe
Lig. ionandrum
Photinia glabra
Raphiolepis Jap.
Vib. rhytidophyllum
Jun. andorra
Jun. pfitzer, large
Chinese redbud
Euonymus radicans
Euonymus patens
Euonymus buxifolia

CAMELLIA SASANQUA. Hugh Evans. Appleblossom.
Texas star.

18-24" -----	2.00	24-30" -----	2.50
30-36" -----	3.50	3-4' -----	4.50

CAMELLIA SASANQUA. Cleopatra. Fugi-no-mine

18-24" -----	2.50	24-30" -----	3.50
--------------	------	--------------	------

We have a few other plants in saleable size such as: Setsugekka, Showa-no-sakae, Sanko-nishiki Splendor, Hinode-gumo. We have about 10,000 Sasanquas in all, including some of the rare ones, coming on for next season.

We are growing what we think is one of the finest ground cover plants to be obtained for very shady spots. We have seen it growing in almost solid shade. It has a narrow blade and will grow only about 4 inches high. *Liriope graminifolia*. Creeping liriope.

Single divisions \$15.00 per hundred.

We also have a small stock of it's cousin, *Ophiopogon japonica*, or Shakesbeard. It's ultimate height is 10 or 12 inches and has a blue flower.

Small divisions 35 cents each.

A personal message to local and nearby garden lovers.

Come to our new salesyard where you may purchase fine shrubs and trees dug right here from our fields. They will be graded to size and ready to go. The practice of digging and heeling-in for awhile is good practice, insuring better livability. The price will be less also.
